

ASIAN HORNET BASIC TRAP INSTRUCTIONS

We thank you for purchasing this item and recommend that you wash the inside before use.

How to make the formula

The trap should contain a total of 180ml of liquid, half blueberry juice or a similar sweet fruit syrup and half dark brown beer or sweet white wine as follows:

- 90ml of your choice of alcohol as above
- 90ml of your choice of sweet fruit juice as above

Placement of trap

For beekeepers, traps should be hung in trees close to or on hive stands. Otherwise the trap should be hung or placed outside in and around any affected areas ideally at head height.

Re-filling

You should regularly replace the liquid within 14 days or sooner if evaporation occurs.

Reporting

If Asian hornets are detected please ensure you alert the relevant authorities as soon as possible.
